

New Software Version 1.14

FFD 2.5" Ultra ATA

Product Update, October 2005
Guy Freikorn (guy.freikorn@m-systems.com)

Description

A new firmware version 1.14 has been released for the FFD 2.5" Ultra ATA. This firmware replaces the current firmware version 1.13. This firmware change provides additional protection for pipeline flushing that occurs in the FFD 2.5" Ultra ATA's Motorola RISC CPU core during interrupt and exception handling.

Ordering Information

The new firmware version is applicable for the following products:

Product	Capacity (MB)	Ordering Information
FFD 2.5" Ultra ATA	All capacities	FFD-25-UATA-CCCC-T-H CCCC - Indicates disk capacity T – Indicates operating temperature range H – Indicates case height

Reason for Change

The new firmware version provides higher reliability under extremely long high speed data transfer conditions.

Availability

The FFD 2.5" Ultra ATA will be shipped with firmware version 1.14 from October 11, 2005.

Please note that firmware version 1.15 for the FFD 2.5" Ultra ATA, scheduled to be released towards the end of Q4-2005, will provide support for new flash processes.

How to Contact Us

Please contact your M-Systems representative or visit the FFD web page on the M-Systems website (<http://www.m-systems.com/rugged>) for any further information or assistance.
